Welcome to the world of machine-made carpets!

**The 1200-reed acrylic carpet is one of the most popular and high-quality types of machine-made carpets, known for its unique features in the carpet market of Iran and the world. The 1200-reed carpets have a very fine and precise texture that gives them special beauty and elegance. Acrylic fibers are made from synthetic materials and are recognized as one of the best materials for the production of machine-made carpets due to their special properties, such as softness, durability, and resistance to wear.**

The Jasper brand is one of the well-known names in the carpet industry, famous for its unique designs and high-quality products. This brand usually focuses on the production of machine-made carpets and strives to showcase a combination of traditional art and modern technologies in its products. The quality of Jasper products is one of the strengths of this brand; therefore, the use of high-quality raw materials and precision in the production process has resulted in Jasper carpets being durable and long-lasting. Jasper's designs are often inspired by various cultures and nature, and this brand aims to meet the diverse needs of its customers by offering a variety of designs. The reputable Jasper collection places great importance on after-sales services and customer satisfaction, with the support team of this brand always ready to respond to inquiries and provide advice to valued customers.
